Brenda:

I would like the data from the 1994 Report (Weston), 1996 Report (Weston), and the 1985 Wink Engineering Report entered into an electronic data (SCRIBE PROJECT) set.

Thanks

Gary,

Most of the data is paper only-the largest data set is the ESI data-I will ask Weston how easy/hard it would be to create an electronic data-set of the ESI. I believe we have enough funds to do this under the existing TDD. I will let you know if this is doable after I talk to Michelle about level of effort.

Brenda:

I understand that you have Weston on TDD putting together a prescore and report. Is there any way that you could have them do the following:

1. Consolidate all the previous historical sampling data for the site and put them in Scribe (Scribe Project) so the information can be displayed and evaluated against appropriate screening levels. (If no GPS coordinates for the data then we need to talk about how it is shown (estimated locations)).

Weston has a flex viewer that the data can be viewed in.

Thanks
